Mechanics, Manufacturers, and Inventors.

THE Eighth Volume of the SCIENTIFIC AMERICAN commences on the 18th of September. It is principally devoted to the diffusion of useful practical knowledge, and is eminently calculated to advance the great interests of industry—Mechanical, Manufacturing and Agricultural—the genius and master-spirit of the nation.

It is unrivalled as a Journal of the Arts and Sciences, and maintains a high character at home and abroad.

The publishers pledge themselves that the future volume shall at least equal, if not surpass their predecessors. Among the subjects chiefly brought forward and discussed in its columns, are Civil Engineering. Architecture, Italicodal, Bridges, Arricultural Implements, Manufactures of Metals, Fibrous and Textile Substance, Machinery for the purpose, Chemical processes, Distilling, Coloring, &c., Steam and Gas Engines, Boilers and Furmaces, Mathematical, Fhilosophical and Optical Instruments, Car., Carriages, Water Wheels, Wind and Grinding Mills Powers, Planing Machines, Tools for Lumber, Brick Machines, Farning, Fire Wheels, Wind and Grinding Mills Powers, Planing Machines, Tools for Lumber, Brick Machines, Farning, Fire Arms, Electricity, Telegraphs, Eurgical Instruments, &c., besides Claims of all Fatents, Reviews, Notices of New Inventions, American and Foreign. The work is in form for binding, contains several hundred Englavings, over four hundred pages of prinsted matter, and a copious Index. Nearly all the valuable Patants which issue weekly from the Fatent Office are illustrated with Engravings in it columns, thus making the paper's perfect Mechanical Encyclopedia for future as well as present reference.

Valuable Frondums are officed for the largest list of Subscribers to this Volume. It is published weekly by MUNN & CO., at their Fatent Agency Office, 125 Fation street, New York. THE STAR OF THE WISE MEN, a Commentary on the 2d chapter of St. Matthew. By Dr. French. Peirce's Notes on the Acts; designed for Bible Classes, Sunday Schools, and private reading.

DISCOVERED AT LAST:

Transition Coal.

Transition Coal.

This rare and valuable Coal is a variety not quite changed into an anthracite, and it has only been discovered (in large quantities) at three plages upon our globe, etc. at South Wales, Great Britain; at Donett, in Russia, near the Black Ses; and at Dauphin and Lebanon counties, Pennsylvania. In the London market this coal commonds the highest price. It is now mined upon the large estate (\$1,000 acress) of the Bauphin and Eusquehanna Coal Company, situated in Pennsylvania, and it is nearer to the cities of Baltimore and Washington than the vool of any other region. For easy ignition, durability of fire, complete combustion, casy adaptation to the temperature of the weather, and its great power in generating heat, it is the assr coal in the world. It has the inflammability of the bituminous coal, with the cleanliness of the anthractic, and a greater durability than either. It burns without making any soot or visible smoke, and the combustion is so complete that it retains the fire until all the coal is consumed. Not so with the anthracites, especially the hard and heavy kinds. They do not burn up, and hence the common troubesome practice of sifting their ashes to obtain more fuel. In burning the Transition Coal there is no waste, for the small coals made by handling, burn as well as ordinary coal. All should be burned together. If screened at all the dust only should be burned together. If screened at all the dust only should be haden out.

A very erroneous impression exists with many persons that the Pearics wals are the most economical for ordinary. THE subscriber respectfully informs the citizens of Washington and the District that he has now finished at his Marble yard the greatest variety of splendid Italian Marble Mantels, richly carved and plain, ever offered for sale in this city. He solicits a call from gentlemen wanting such articles, as he will soil as low as any of the Northern cities. He has now finished a number of pure white Eastern Marble Headstones, of various designs, which he offers on moderate terms, and will execute Monuments and Tembs to any design or drawing given. ARY SEAHAM, by Mrs. Grey, author of the Gambler's Wife, and said to be the best work ever before written by her. It is one of the most bewitching and charming works that has ever been published.

Old Saint Paul's-by William Harrison Ainsworth, embel ished with large, spirited illustrations.

The Discarded Daughter-by Mrs. Southworth.

The Clifford Family, or a Tale of the Old Dominion—by one of her Daughters.

Book of Snobs—by Thackery.

Summer Time in the Country—by the Rev. R. A. Willmott.

harmout ogether. It screened at all the dust only sheme to taken out.

A very erroneous impression exists with many persons that the hearcast coals are the most economical for ordinary purposes. This might be the case if coals were rold by measurement, but never when they are sold by weight. In Taylor's valuable work, (Statistics of Coal, the details are given to show that 31 pounds of a free-burning red ash yielded more heat to a room in 15 hours, than 37 pounds of a heavy white ash coal, making the red ash, at \$5 50, to be more economical than the white ash at \$6 50 per ton. Any person accustomed to use these heavy coals will be astonished at the saving which can be made in burning the lighter kinds, when tested by the weight and burnt in a suitable manner. Recently Patented in this Country and Europe.

COCHRAN'S FLANGERHEAL QUARTZ CRESHING AND PULYERIZING MACHINES are now in daily operation for the inspection of the public, and will be submitted to any reasonable practical tests proposed by parties interested.

These machines, by their simplicity of construction, their durability, the undoubted principles upon which they operate, their effective operation and result, are justly entitled to the consideration of all parties engaged in grinding, crushing, and Pulverizing Quartz, fron Ore, Zinc, Copper, and Lead Ores, and all other Ores or Mueral substances.

It is the peculiar feature of the economy of these machines that they are found capable of crushing and pulverizing into the fuest powder any amount of Quartz or other earthy matter, in proportion to the amount of weight or powar applied. The earthy matter is so completely ground and pulverized, that the Gold may be easily separated, and subjected to any process of amalgamation that may be no cessary.

The machines work and deliver wed or day as may be re-

ished at the awing which can be made in burning the lighter kinds, when tested by the weight and burnt in a suitable manner.

An apprehension exists with some that the free-burning ceals have a tendency to clinker. Now, as a general rule, no coal will clinker unless agreater draught be applied to it than the coal naturally requires. No one would think of applying a bellews constantly to a fire made of seasoned hickory or oak wood, and it would be equally as absurd to apply a bleat constantly to a free-burning coal. But the heavywhite ash authracites cannot be burnt without a powerful draft, and without using a larger quantity of coal than the temperature of the weather sometimes requires. Various pat terns of stores, furness, cooking ranges, &c., are invented annually to conquer this difficulty, but it has never been done with complete success. In wery contrivance, however, which has been invented to burn coal, the transition variety will make a beautiful fire, and no complaint will ever be made to a manufacturer or seller of grates or stores when this coal is used. The draft alone is to be regulated by a damper. In introducing this new coal for the first time, prepared as it now is by steam power machinery for domestic use, it may give greater confidence to the buyer to essy that the celebrated free burning red ash veius in the Peach Orchard district, near Pottsville, are a continuation of the Dusprine cefins, and they approach the nearest in value to the Pransition coal.

Shipments of the Transition coal have already been made to the District of Columbia, and it can be obtained at retail from the following persons:

Win. T. Dove, Washington.

F. Magruder, do

Myers & Baker, Georgetown.

Office southwest cerner Baltimore and South ats.

Bullmont, Sept. 16, 1882.

ACARD.

subjected to any process of amalgamation that may be no ceasary.

The mechines work and deliver wet or dry, as may be required, and run with little friction, (being almost without machinery,) required no lubricating; the principle upon which they operate precludes the possibility of their being put out of order; nor do they heat any material while being putverized. They are at once applicable for all purposes of grinding and pulverizing, from these required by the Drug gist to those of the most extensive operations in California and Australia.

These machines are from two to twelve feet in diameter, with balls or spheres from three inches to five feet in diameter, each machine weighing from 250 pounds to 20 tons each, and are sold, with the right to use them, at from \$100 to \$5,000 each.

They can be worked by steam, water, horse or manual power, according to their size; and by changing the velocity and proportioning the weight on the tep of the balls, any desired amount of power may be used, from that of a man or horse upward.

The proprietors of this invention solicit examination, and will prove by practical tests the and superiority and economy of these machines over any other, for crushing, grinding, or pulcarizing, hardofore offered to the public.

These machines may be seen in operation at the foot of South Eighth Street, Williamsburgh, at the large Patein Block and Saw Factory of Messars. Burr, Waterman & Co., first street south of Peck Slip Ferry, very day, from 7 to 9 a.m., and from 4 to 6 p. m. For further particulars, apply to E. & J. BUSSING & CO., aug 23—2w S2 Cliff street, New York. A CARD.

THE SUBSCRIBER begs leave to return his thanks to his friends for the very liberal support they have even him, and respectfully solicits a continuance of the same. He may be found at all times at his old stand, on b treet, between 7th and 8th streets, where his expenses are small, and afford him an opportunity to sell on mederate errors to his customers.

DENTISTRY.

D. R. CASADAVANT, Furgeon Dentist, formerly from Parls and New York, returns his il neere thanks to the citizens of Washington and Georgetown and vicinities for the liberal patronage which they have extended:) 1: m since he has established himself in this city, and would inform them that he has removed to Lane & Tucker's building, on Pennsylvania arenue, between the National Hotel and 4½ street, where he still continues to perform all operations in his profes sion in a superior manner, at New York prices, so as to enable all to test his skill, and he warrants his work to be equal to that of the best Dentists. As he manufactures his own artificial teeth, he is enabled to suit all cases, and will undertake to perform all these operations in which other Dentists have failed to succeed. He will refer to many citizens of Washington and Georgetown, for whom he has performed operations.

Protection from Lightning.

THE undersigned, being the duly appointed Agent of SPRATT'S ELECTRICAN AND ELECTRO-MISTALIBRIUST LIGHTNING-ROD MANUACTORY, Covington, Kentucky, begs to offer these superior Rods, of Spiral-twisted, Carbonized Annealed Iron, with Zine Protectors, and Electro-positive elements combined in their manufacture; thus rendering them equal to copper as conductors. They are in ten-feet lengths, with accurately-fitted brass-screw connecting joints, an entire new style of metallic (patented) attachments, for brick or frame buildings; also, glass isolaters, of a novel and ingenious construction, (patented,) forming a lock; the whole meunted with a solid platinum silver point, (patented,) twelve inches long, surrisunded at the brew with three angular negative magnets, which possess the power, to an extraordinary extent, of discharging the opposite elements of the most fearful thunderstorm, and embrace the entire perfection of science up to the present time; the whole constituting the most magnificent and perfect fielut conductor ever presented to the public.

Safety has not been compromised by affording these excellent rods at such low rates; the greatest attention has been given to their construction, so as to be readily attached. The astenishing power of the negative magnets, in discharging the six of its opposite elements, has been clearly demonstrated by the Electrometer, when unmagnetized points have shown but slight results, though placed under the same conditions. In fact, they gather and silently discharge electricity from the atmosphere when you would scarcely suspect any being present.

These improvements being secured by double letters patent, you are, hereby cautioned against laying yourselves liable, by purchasing of those who are not authorized, or who are substituting inferior imitations. All agents duly appeinted can show their certificate. Have good rods or none.

CHARLES W. HEYDON.

Washington City. VIE undersigned, being the duly appointed Agent of SPRAIT'S ELECTRICAN AND ELECTRO-METALLURGIST LIGHT-

sufficient to show that atmospheric influences would have no sensible effect.

JOHN LECONTE, Prof. of Nat. Phil. et Chem.

UNIVERSITY OF GA., October 8, 1850.

The Lightning Conductors of Mr. Spratt, offered to me, are well calculated to perform the office for which they are intended. Yours, truly,

Prof. ROBT. PETER.

Largerors, Kr., Pebruary 20, 1850.

Chicaso, September 3, 1850.

This may certify that I have examined, somewhat critically, James Spratt's Patent Lightning Rods, and that I im of opinion that it is constructed on scientific principles. For combining durability, cheapness, and efficacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

Prof. JAS. V. Z. BLANEY.

AUGUSTA, (GA.) November 11, 1850.

This will certify that I have examined the Lightning Rods, Metallic Points, and Isolating Attachments, manufactured by Mr. Spratt, and regard them as constructed in conformity to the general laws of the electric fluid; and the metallic compound constituting the Points, as promising, from the result of several tests to which they were submitted, to resist for years the action of those atmospheric causes

from the result of several tests to which they were submitted, to resist for years the action of these atmospheric causes most likely to cervode them.

A. MEANS,
Prof. Phys. Sc., Emory College, Ga., and Prof. Chem. and Pharm., Medical College, Ga.
The Lightning Conductors put up by Mr. Henry M. Smith, of this city, on the plan of Mr. Spratt, appear to me to be very well devised; and, in point of mechanical construction, are the best I have ever seen.

It is to be hoped that the use of these Rods may become general, as an important auxiliary defence against a danger which must be regarded as of no ordinary magnitude, to which all buildings are liable.

Prof. of Chem. in the University of Louisville.
Louisville, January 27, 1851.

GRAY & BALLANTYNE, 7th #L.

I do hereby certify that I have applied various powerful chemical re-agents to Spratt's Patent Points for Lightning-Rods, and that the results of these experiments convince me that they will resist the action of atmospheric causes, and thereby preserve the extremity sharp—a condition most essential to protection against lightning. The re-agents used in the above experiments were a solution of chloride of so dium, (common sait,) acetic acid, sulphuric acid, and hydrechloric acid. With the first, there was no action on the metal; with the serval acids, there was very slight—a fact sufficient to show that atmospheric influences would have no sensible effect.

JOHN LECONTE, Prof. of Nat. Phil. et Chem.

mar 29-tf JAMES ARTHUR O'CONNER. TOBACCO, CIGARS, &c., ARRIVING.

A BOOK FOR THE TIMES.

It ELPS to a 'ife of Holiness and Usefulness, or Caughey's Revival Miscellanies. The demand for this book is almost imprecedented in the history of Mothodist publications. Six thousand copies have been sold in about four months. The seventh thousand is now ready. Read these notices of its character:

"These sermons are admirably fitted for preducing effect, immediate, powerful effect, upon the popular mind. Brief, hitting, bold, subjective, abounding in anecdote, tilustration, pathos; nover prosy; never halting for a moment in confident persuasion that sinners are to be converted by the truth they press home. * * We unbesitatingly recommend the circulation of this book."—Rev. Dr. Weghiman, Ed. S. C. Adecoate.

"It is a good work, and all that have bought it say soons the 'Overlanding's of Kelli, that it even here more of an or the 'Overlanding's of Kelli, that it was here never of the contraction of the book."

and a variety of fancy articles.
